JESIN MILESH M

B.E. CSE (Cyber Security) Student

+91 7418431480 | jesinmilesh61@gmail.com | Nagercoil, Tamil Nadu | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Motivated Cyber Security student (CGPA: 9.07) skilled in Python, and network security with practical experience building security-oriented tools and management systems. Demonstrated ability to work with Nmap, Wireshark, and OS-level subsystems for threat detection and behavioral tracking. Actively seeking an internship to contribute to real-world security operations and deepen hands-on expertise.

EDUCATION

B.E. Computer Science & Engineering (Cyber Security Specialization) *2024 – 2028*

Prathyusha Engineering College, Tamil Nadu **CGPA: 9.07**

TECHNICAL SKILLS

Languages: Python, Java, C, SQL
Databases: MySQL, SQLite
Security Tools: Nmap, Wireshark
OS / Platforms: Linux (CLI), Windows
Concepts: Network Security, Vulnerability Assessment, Ethical Hacking, SOC Fundamentals
Other: Git, tkinter, Regular Expressions, AWS Cloud Fundamentals

PROJECTS

Automated Network Log Intelligence & Threat Analysis

- Built a desktop application for real-time network log monitoring, threat detection, and behavioral analysis.
- Non-blocking network scanning via Python threading; OS-level data collection using subprocess (netstat, wevtutil).
- Regex-driven log parsing, CSV export, and time-series behavioral tracking with collections & datetime modules.
- Hardware-level audio alerts via winsound for immediate incident notification; GUI built with tkinter.

Employee Management System

- Developed a full-stack desktop application to manage employee records with CRUD operations and role-based access.
- Designed normalized relational schema in MySQL; integrated with Python backend for secure data transactions.

Inventory Management System

- Built an inventory tracking system with automated stock alerts, search/filter functionality, and report generation.

Account Registration System

- Implemented secure user registration with input validation, password hashing, and duplicate-entry prevention.

CERTIFICATIONS & ACHIEVEMENTS

- AWS Educate: Introduction to Cloud Computing 101 — Amazon Web Services
- WIFI Pentesting — Cappriciosec University
- Python Programming — NICEDT
- Hack with India Hackathon — Microsoft (participant)
- Codeathon 3.0 — College-level competitive programming event (participant)

SOFT SKILLS

- Analytical & Critical Thinking
- Attention to Detail, Self-Directed Learning
- Team Collaboration, Effective Communication
- Time Management, Problem Solving
- Leadership, Adaptability

AREAS OF INTEREST

- Security Operations Center (SOC)
- Vulnerability Assessment & Penetration Testing
- Network Security
- Ethical Hacking
- Cloud Security
